## **Clark Forklift**

At this time, there are no less than 350,000 Clark lift trucks performing worldwide, and in excess of 250,000 operating in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, duel fuel, petrol, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specialized parts designed for 20 exclusive designs of forklifts and automated equipment. Your local Clark Seller is your total source for availability of all your components requirements offered by Clark Totalift.

Clark's exceptional Parts Distribution Centers are conveniently located in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Motivated to supply the highest level of value and service to our customers, Clark remains on the leading edge when it comes to improving efficiency and benefiting performance.

Clark Totalift has a very impressive international support network. With over 550 locations worldwide, seller representation in over 80 nations and 230 locations in North America, their high level of commitment to their customers predominates the material handling market.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated forklift industry. This exceptional dedication to safety is currently a standard feature on every forklift.

Clark's continual effort to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first lift truck manufacturer across the globe to be certified with the internationally accepted quality standard ISO 9001 for every one of their manufacturing plants. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any environmental restrictions, thus placing them in a dominant industry position.

## Lean Production

Clark has selected the system of "Lean Production" at all of its assembly facilities for the reason that this method is particularly economical and permits minimal use of resources. Established to guarantee maximum proficiency, this system is intended to discover and acknowledge the most effective ways for production facility stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

## Engineering

By working in concert, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing expenses. The contemporary value engineering agenda combines progressive product development and delivers superior customer support and service within the industry.
