

Mount Vernon Boom Lift Training

Marysville Boom Lift Training - Aerial platforms or likewise known as elevated work platforms are devices which allow workers to perform tasks and duties at elevated heights which will not be otherwise accessible. There are a variety of aerial lifts available to carry out various applications under various site conditions. If operated carelessly, elevated work platforms can lead to fatality or serious injury. The most common causes of related accidents are electrocution, falls, tip-overs and crushed body parts. Lift operators should be trained fully in techniques to prevent accidents during the operation of lifts.

Aerial Lift Safety program is intended for individuals who have to operate the devices more safely and effectively. The program provides thorough instruction on the most utilized lifting devices in the industry.. Types of lift covered consist of boom supported, scissor and articulating aerial lifts. The video presents the right procedures operators must follow. Instruction focuses on protection against falls, pre-operational inspection, stability of the device and safe driving procedures.

The course addresses equipment reliability and employee safety. All instructional materials are compliant with state, government and provincial agency regulations and requirements. Course management and training methods would be taught. The trainer will also know the technical aspects of aerial lift safety.

Components of the Boom Lift Training program comprise both classroom training and practical training. Both sessions should be successfully completed for the participant to receive a certificate of achievement.

The self-propelled boom-supported elevating work platforms are different from the self-propelled elevating work platforms in that they are able to position their work platforms entirely beyond the base of the equipment. The theoretical part of the training is practically identical for both types. The practical component of the training can be finished faster if just one type of machine is utilized.

Elevating Work Platform Training Program Objectives:

For the safe operation of Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training will help operators use their machines more efficiently and would lessen the possibilities of accidents in the workplace. Trainees will review of applicable rules and company policies, talk about Due Diligence, study Criminal Negligence and consequences to trainers, employers, supervisors and employees. Participants will study machine features, operating procedures, stability, charging/fueling procedures and parking. Site-specific safety matters would be addressed.
